Crossfield Sports Day Monday, July 2nd.

The Crossfield Board of Trade is again sponsoring the annual Dominion Day Celebration to be held this year on Monday, July 2nd. For many years Crossfield has held this day and have had some real successful sports, and this year will be no exception.

Among the attractions already lined up for the occasion is a baseball tournament that promises to create unusual interest. Other events are being scheduled that will round out a full day of keen sport, fun and merriment for young and old.

A big dance in the evening will top off the day, and a snappy orchestra will furnish the music.

School Fair Donations

Secretary May states that the response to his appeal for donations has been very gratifying so far. It looks as though we shall have a wonderful prize list and there is no reason why this year's School Fair will not be bigger and better than ever.

The local list is headed with a donation of a ewe lamb from J. A. Hole, Airdrie. Other donations are as follows:
Mays School Supply House 3 books
Pringle's Hatchery 25 Baby Chicks
Hambley Hatchery 100 Baby Chicks
Calgary Herald 500
W. K. Gibson, Watkins Products 300
Anderson Feed Store 120 the Calf Man
Hudson's Bay Co. Goods valued at 300
A. M. Terrill, florist 1 Fern
Calgary Albertan 6 months sub.

Rain Halls Football Game at Madden

The football game at Madden on Sunday between Bridgeland Rivers and Madden was halted by rain after 15 minutes of play. The Calgary club was leading by one goal to nil at this time. The Madden club had the better of territorial play and passed up at least two good scoring chances.

These teams will meet again during the summer and it will be a real battle.

Six Teams in Softball League

The Crossfield Softball League has been re-organized for the season with the following officers: President R. M. McCool, M. L. A.; Vice-President, W. Stauffer; Secretary, Verne Thompson.

Six teams comprise the league, namely, Rothen, Tany-Bryn, Onell, Sunshine, Inverlea and Crossfield. Games will be played on Sunday and during the week. A schedule has been prepared and is displayed in the Oliver Cafe.

Rain Puts Damper on Week-end Games

The million dollar rain on Sunday, which was general throughout this district, caused the postponing of the baseball game between Crossfield and Calgary. The games in the Bush League were also called off owing to the deluge.

Isabel Leask Medal Winner In Piping Competition

Miss Isabel Leask was the winner of a silver medal at the Calgary Girls' Pipe Band piping and dancing competition, held in the Al Azhar temple, Calgary, on Friday. Isabel was awarded second prize in the girls piping contest.

Crossfield has a real snappy junior baseball team and is ready to play any junior team in the district (13) thirteen years of age and under. Games can be arranged at the Chronicle office.

Jas. Scott who last week disposed of the Scott Tire Shop to W. Shivan of East Coulee, has left for Oids, where he will open up a Tire and Vulcanizing Shop.

Chas. Mayman is building a log house. Stanley Reid is doing the work.

Grand Dance May 24th.

Keep in mind the dance and big night in East Community Hall on May 24th. The McDougall Family of Entertainers have been secured as an added attraction and the burning of the mortgage will be carried out in a very spectacular way.

No increase in prices.

Neighbors Honor Mr.

and Mrs. John Morrison

A very large crowd gathered in the Inverlea School on the evening of May 17, 1934 to honor Mr. and Mrs. John Morrison in a little farewell greeting, before they left for their new home in Victoria on Sat. 19. The countless numbers of willing faces all eager to help to make the evening a success showed the great respect in which Mr. and Mrs. Morrison were held.

The evening started off with community singing, Mr. Melling then was especially requested to sing "All over the Shop" and for an encore gave "The Beautiful Twins," both songs were greatly appreciated. The Vets then rendered a few army songs which brought forth a hearty clap. Mrs. Leant, Mr. S. Cameron, Mr. Bennie, Mr. and Mrs. Bert Lilley all sang request numbers which were enjoyed, while Donald Fleming and Mrs. Bennie gave enjoyable vocal and instrumental numbers. Walter Lilley pleased the crowd with his accordion selections, games were played with lots of fun.

Mr. Leant as representative for the Crossfield Old Timers, and also for Inverlea and Sunshine districts gave an interesting and well worded talk in which he told of Mr. and Mrs. Morrison, coming here in 1906 from Chicago--their work and favor in the district for many years and finally wishing them Godspeed, happiness, and health he presented them with a beautiful electric grill, cups and saucers, and an electric toaster. The former from the Inverlea and Sunshine district, the latter from the Crossfield Old Timers Association of which Mr. Morrison is an honored member.

Mr. Morrison made a very fitting reply in thanking them one and all for the gathering and presentation and hoped to see any one who should be fortunate enough to travel to Victoria. "A most beautiful spot."

The evening broke up with the singing of "God Be With You Till We Meet Again."

Hardly Worth While

With only five students taking Grade XII in the Crossfield school, there is no good reason why it should be continued here.

Lethbridge is questioning the advisability of dropping Grade XII.

Pool Room Broken Into

Take Cigarettes and Tobacco

Pogue's pool room was broken into late Saturday night or Sunday morning, and a quantity of cigarettes and tobacco taken. Fortunately Bill had only a small stock on hand at the time. Entrance was made through a rear window.

Carstairs News

The wedding of Rheta, second daughter of Mr. and Mrs. H. C. Beckner, to Norman W. Campbell, younger son of Mr. and Mrs. Alexander Campbell, took place recently at the home of the bride's parents. The bride was attended by her sister, Miss Beckner, while Donna Beckner was flower girl. Mr. Charles Pearson acted as groomsmen. Following a honeymoon at Banff, Mr. and Mrs. Campbell will take up residence at Cremona.

George Leask of Madden sold a carload of fat steers to P. Massie who shipped them to Vancouver on Tuesday.

Future World Peace Will Be Assured When Nations Learn To Live And To Let Live

The following article, being an editorial on war, appeared in a recent issue of the Rotarian Magazine:

Anyone who believes that from the beginning of time the World War was fated to come is in an illogical position even to hope for a warless world. But he who regards all wars as a direct consummation of policies of participating nations, can build an optimism around a conviction that men, being thinking animals, need not forever blunder into bloodshed but some day will consciously choose courses of action that prolong peace.

Wars do not happen suddenly. They are made in time of peace. Then popular desires are shaped into national policies that conflict, and eventually clash with those of other countries.

It is interesting to conjecture what might have happened if, say in 1900, peoples of the 27 nations that were drawn into the holocaust of 1914-18 had clearly realized that the policies then being born would lead to that conflict. Perhaps, in considering whether the national aims should be pursued unmodified, far-seeing leaders might have stated the case thus: "These policies will lead to war. That war will take 30,000,000 lives, cost \$400,000,000,000, and the moral of civilization, precipitate a world-wide depression.

"If these policies are not pursued, 30,000,000 lives will be saved, civilization will proceed without interruption. And with the \$400,000,000,000 we shall be able to give a \$2,500 house, furnished with \$1,000 of furniture, and five \$100-cars to every family in the United States, Canada, Australia, Great Britain, Ireland, France, Belgium, Germany and Russia; to put a \$5,000,000 library and a \$10,000,000 university in every city of 20,000 population in the countries named; and, furthermore, establish a fund which, at five per cent. interest, will for all time pay a \$1,000 annual salary to 125,000 teachers and 125,000 nurses."

With the question so posed, it would seem to us, that the nations of 1900 would have been willing to sacrifice even cherished national aims for the benefits of peace. But would they? With thousands of maimed men yet living and fleets of merchant vessels running in harbors to remind us of the cost of the last war, we of 1934 persist in desires which are crystallizing into national aims that can but lead to conflict. Realistic newspaper correspondents each morning scan dispatches, ready to hasten to the cradle of "the next war"—a war that admittedly will bankrupt civilization.

It can, of course, be avoided—at a price. The price is that nations learn how to live and to let live. Even though it involves relinquishing of what in an early day of relations between individuals was called "rights." Men of goodwill will continue to believe that some day governments having weighed the case, will elect to do this.

Find Them Expressive

Many American Slang Terms Found In Oxford Dictionary

However rude or crude are American terms, they are so expressive and impudently near the truth that it is very hard to resist giving them a place in any honest lexicon. Such terms are "graft," "once-over," "foolproof," and "step on the gas." This was the explanation given by President George Gordon of Magdalen College, Oxford, England, for their inclusion in the new supplementary volume of the Oxford Dictionary. Among other phrases which have been introduced into the English language in the last 50 years and given a place in the dictionary are "all of a doo do," and "give it the once over."

Preserves The Flavor

Government scientists, who have been experimenting with the freezing of vegetables to preserve them report that, in all cases, the flavor and general appearance of experimental lots of frozen vegetables were superior to vegetables canned by the usual heat process, both before and after cooking.

Acted As Boomerang

Hit by its own torpedo, fired in naval manoeuvres at Hana Bay, Sweden, a vessel was considerably damaged. The torpedo was deflected and completing a circle, struck the ship from which it was fired.

Facts About Cyanamid

New Fertilizer Provides Nitrogen Quickly For Plant Use

Because of the numerous inquiries re Cyanamid, the Department of Chemistry, Ontario Agricultural College, believes that there is a certain amount of error in the minds of some farmers regarding this new fertilizer. The plain statement of fact is that Cyanamid is a valuable carrier of nitrogen, supplying 22 lbs. of N to the 100 lbs. but it is not a complete fertilizer. The nitrogen from Cyanamid is rapidly available for plant use. It promotes stalk and leaf growth, and is especially valuable for meadows, pastures, orchard trees and garden crops harvested in the green state.

Moreover, in every 100 lbs. of Cyanamid there is line equivalent to 70 lbs. of hydrated lime which corrects the acidity of the soil and makes conditions favorable for the growth of clover, alfalfa and other legumes; and for such garden crops as cabbage, asparagus, lettuce, onions and parsnips.

In asparagus growing it has been found that Cyanamid applied at the rate of 500 lbs. per acre will effectively kill weeds while they are young and tender and will improve the asparagus. When used for this purpose it is best applied broadcast while the weeds are damp with dew.

The manufacture of Cyanamid is of great interest in that nitrogen is taken from the air. Eighty parts out of every 100 parts of the air we breathe is nitrogen; this is equivalent to over 90 million lbs. of nitrogen over every acre of the earth's surface. In spite of this abundance of nitrogen in the atmosphere the growing crop cannot make use of this supply unless the nitrogen has been combined and supplied in such carriers as Cyanamid and other forms of nitrogen-bearing fertilizers, or is fixed in the soil by nitrogen-fixing bacteria, or is applied to the soil in the form of waste products of animal and plant life. By the use of electricity it was found possible to combine calcium of limestone with carbon and with nitrogen from the air forming calcium cyanamide. This forms a grey colored product which is marketed in granular form.

For best results, Cyanamid should be worked into damp soil as soon as possible after its application.—Bulletin O. A. C. Guelph.

Policy Is Wrong

Situation Made Worse By Helping Farmers With Handouts

Hon. Duncan Marshall, who as Canadian commissioner of agriculture in 1922, asserted that most of the farmers' troubles would be over if governments would "stop trying to make farmers rich with handouts" and instead educate them to use resources of their farms to the best advantage.

Governments can help the farmer, he said, by doing something to reduce the two things "which have helped to destroy the farmers of your country and mine—taxes and interests." He was addressing the Chicago Association of Commerce.

A method of keeping orange juice in cold storage without sterilization has been perfected at the Florida Agricultural Experiment Station.

Points in Rose Planting

Necessary To Make Sure That Roots Have Not Become Too Dry

When new rose plants are received, it is important that the roots should not be allowed to dry out under any circumstance. It is a good practice when opening the parcel of rose plants to plunge the roots into water and leave them there for several hours, or to bury the plant, root and branch, in moist soil for a few days. Either of these practices will restore the moisture in the stems that has been lost during the winter season.

Hybrid tea roses should be planted about 18 inches apart; hybrid perpetuals, two and a half to three feet; and the rugosa hybrids, the moss roses, and other large-growing hardy sorts about four feet apart. It is necessary to prune back severely, and the bushes should be planted deep enough so that the point of the union between stock and scion is from two to three inches below the surface of the ground. This is important, because, if the union is at or very near the surface, the sun shining on it hardens the wood and prevents a free circulation of sap, which is not desirable as a strong vigorous growth is necessary for best results. Roses need an abundance of moisture and the surface of the soil should be kept loose from spring until midsummer. After each rain the rose bed should be hoed or raked, leaving a thin surface of soil, or during a dry time, if it is necessary to water the roses, the soil should be loosened after watering. It is better to water roses thoroughly occasionally, than to give them a light watering frequently.

The First Coal Mines

Pits Were Shallow And Coal Was Obtained By Tunneling

Coal was first dug in the British Isles on the south shore of the Firth of Forth. For centuries there were no means of draining coal pits, and early coal was obtained in hilly districts, where it could be reached by tunneling. In some places shallow "bell pits" were dug. In 1719 the deepest coal mine in the country was only 380 feet deep. Gun-powder was first used to blast coal in that year. In pits where fire-damp accumulated, it was exploded each morning by a resolute man of purpose, who went down clothed in rats saturated with water and provided with a long pole at the end of which was a lighted candle. There was no form of safety lamp until the year 1815.

Make Good Messengers

Scotland's Girvan Pigeons Are To Be Depended On

Scotland's wonder birds, Girvan pigeons, are superior to the radio for resolute man of purpose, who went down clothed in rats saturated with water and provided with a long pole at the end of which was a lighted candle. There was no form of safety lamp until the year 1815.

Has Overcome Obstacles

Hats off to Eleanor Gertrude Brown of New York who, in spite of being blind from birth and burdened by poverty and sickness, will graduate from Columbia University with the degree of Doctor of Philosophy. When some of us think we are having a hard time think of Miss Brown, who has made stepping stones of what most of us would count insurmountable obstacles.

Limited To Prairies

The commercial production and demand for bromine, western rye, and created wheat grass seeds is practically limited to the Prairie Provinces, where last year 900,000 pounds of bromine, 225,000 pounds of western rye, and some 3,000 pounds of created wheat grass commercial seeds were produced.

A new type of aerial camera which will take pictures automatically from the aeroplane wing at intervals of six seconds, has been perfected. The views are assembled later into one continuous film.

By Ruth Rogers

AN ADORABLE NEW CAPED SLEEVE DRESS

And a likeable model from every point of view. You'll adore this delightful little dress with all its new, young and modish features.

It has the cape sleeves so a la mode, sun back and wrapped skirt which allows plenty of freedom for motion.

Lovely schemes in cottons, linen and tub silks can be worked out most attractively in this model. The sleeves can be of self-material, if you prefer.

Style No. 665 is designed for sizes 12, 13, 15, 17 and 19 years. Size 15 requires 2 1/2 yards of 39-inch material with 1 yard 39-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Like Ocean Travellers

We are like men and women who pace the decks of ships at sea; we seem to come back again and again to the place of our departure, but while we have been moving we have come into new latitudes and longitudes and the constellations themselves have altered their relationship to the journey on which we started. All this is part of the deep meaning of life.

Rhubarb may be propagated from seed, but as the identity of the variety is likely to be lost through cross-breeding in the fertilization of the seed, it is better to propagate by transplanting sections of the root.

Canada And United States Relationships To Be Studied By The Carnegie Endowment

Holland Destroying Cattle

Hopes To Put Dairy Industry On Paying Basis

The mania to force prosperity by wholesale destruction of valuable property is extending to Europe. A plan has been authorized by the government of Holland whereby two hundred thousand head of valuable dairy cattle will be slaughtered in an effort to put the dairy industry on a paying basis.

A central body has been organized with government authorization and it is empowered to impose a levy on all cattle slaughtered in Holland. The returns from this go into a central fund and this fund is again used to purchase cattle for slaughter, the meat and by-products being disposed of on behalf of the central organization. It is said that the number of cattle in Holland in 1933 was 1,452,311.

Some economists profess to see in the destructive methods that are applied to industry throughout the world the possibilities of an eventual famine. It is certain that these methods are contrary to all the principles of thrift which have been taught in the past.

What Interested Him

Frenchman Not Admiring Young Lady As She Thought

A fair creature who returned recently from Paris has told us of a grand passion she encountered in the Cafe du Paris, where she lunched alone one day. A handsome Frenchman at a nearby table kept glancing at her while she opened a stack of mail she had just received from America. The glances apparently becoming progressively warmer as she proceeded. When she was about to leave, having paid her check, and go out of his life forever, it was too much for the boulevardier. He approached her, bowed, and said, "Madame, will you be so gracious as to permit me to remove the stamps from your letters?"—The New Yorker.

Artificial Rain

Experiments Being Carried Out In Russian Areas

Artificial rain was produced in the neighborhood of Achhabad in Russia by scientists who have been experimenting to obtain this effect. With the aid of chemical compounds they produced a fog on a sunny morning and as the wind carried this across the fields it deposited drops of dew on the soil. The scientist method will draw rain from a cloud, the scientists state.

These results are of great significance for in the great stretches of Turkistan and other areas in the U.S.S.R. days on which rain and snow fall over this area usually total but 100, leaving more than two-thirds of the year dry.

Clothes moths were brought to America from the Old World.

An attack on the problem of international peace through a broad study of 150 years of peaceful relations between Canada and the United States was announced by the Carnegie Endowment for International Peace.

Dr. James T. Shotwell, director of the endowment's division of economics and history, revealed details of a vast plan for surveying economic, social and political contacts between the neighboring nations.

While the project has been under way for two years, it had not been previously made public. The survey involves two more years' intensive research with large staffs working in the United States and Canada.

At the same time, Dr. Shotwell said his division has completed its 150-volume history of the Great War, except for two volumes to be published in the autumn.

The study will cover the relations of the two countries from the time they were fur traders and forest rangers down to the present. The endowment expects the survey to produce a vast amount of valuable data.

Dr. Nicholas Murray Butler, president of the endowment, will head a central international committee to plan the character and scope of the survey.

Sir Robert Borkin, Rt. Hon. Arthur Meighen, Senator Rudolph Lemieux, Sir Robert Falconer, Dr. C. W. Colby, Newton W. Rowell, K.C., Vincent Massey, Edward W. Beatty, K.C., Thomas R. Russell, John W. Daffoe and Dr. R. C. Wallace are the Canadian members.

Technical committees for each of the major problems will conduct the actual survey. Distinguished economists, engineers, historians and other professional men on each side of the border will participate.

Ten to 15 volumes dealing with subjects of outstanding interest are expected to be published within the next two years.

Engineers Use Mirage To Measure Distances

Strange Phenomenon Of Nature Makes Calculation Very Accurate

Remarkable photographs of mirages, believed to be the first of their kind ever made, have been obtained by a photographer at Debreen, Hungary. The views may prove of considerable scientific value in studying one of the strangest of Nature's phenomena. Few places in the world are better suited to the observation of mirages than this Hungarian inland, an almost level plain rimmed by higher land.

Strange apparitions appear above the horizon as the sun breaks through a morning mist. Greatly magnified, church steeples and houses of far-away villages appear in the sky above the horizon. Even distant carriages and railroad trains, normally invisible, come into view as fantastic spectres. Sometimes the visions appear half-submerged by water, as in a flood.

The explanation of these strange images is to be found in the fact that layers of hot and cold air, having different refracting or light-bending powers, may deflect rays of light reaching an observer from a distant object and give a false impression of its distance and size.

In some cases the air layers act like a telescope lens and enlarge as well as elevate distant objects. In parts of Central Australia, where the landscape is bare and wide, illusions of trees and islands can be seen.

Engineers of the Canadian government have used the mirage in measuring distances across large bodies of water. This new system of measurement is based on the fact that refraction over water is always greater at night and distances over water which are invisible in the daylight can be seen at night by the use of lights on the distant shore. In the Georgian Bay district of Ontario, some stations built by measurement purposes cannot be seen from other stations during the day, but at night strong electric lights make the stations visible. After four o'clock in the afternoon, the mirage makes possible better sight of the distant station, and at night this becomes still better. Armed with figures on the refraction of light, the engineers are able to calculate the distances accurately.

Generally speaking the soil requirements of soybeans are similar to those of corn. A soil too acid for clover will often produce a good crop of soybeans.

MARY PICKFORD RETURNS TO THE CITY OF HER BIRTH

The famous screen star, Mary Pickford, went home to Toronto, the city of her birth, recently, and was accorded a tumultuous welcome. It was her first visit in many years and was made at the special request of Toronto, which is this year celebrating the centenary of its incorporation as a city. Above we see Miss Pickford as she responded to the various tributes tendered her at the civic luncheon in her honor, while at the right is a view of one section of the enormous throng that crowded the City Hall to participate in the civic welcome given there to the popular star.

AFTER ACCIDENT SHE PUT ON WEIGHT

Kruschen Took It Off Again!

A woman sends the following account of the consequences of an auto accident in which she was involved:—
"A year ago I had a very bad automobile accident, which left me more or less a cripple. Having to lie in bed so long, and being unable to move, I began to put on flesh. When I was able to walk a little again, I found I was 144 lbs., and being just under 5 feet you may guess how I was placed. So I thought I would try Kruschen Salts, and I must say they have done me a lot of good in every way—helped me in keeping my weight down. In three months I lost 6 lbs. Then I left off taking the Kruschen, and I soon went up to 142 lbs. again. So at once I got more Kruschen, and am again steadily reducing. My weight last month was 134 lbs." (Mrs. W. H. M.)

Kruschen combats the cause of fat by assisting the internal organs to perform their functions properly—to throw off each day those waste products and poisons which, if allowed to accumulate, will be converted by the body's chemistry into fatty tissue.

WORLD HAPPENINGS BRIEFLY TOLD

Nathan F. Gropper, Saskatoon, won the prize for the highest standing in second year dentistry at McGill University, it was announced.

Leon Trotsky has shaved off his famous beard and moustache to conceal his identity as he wanders about Europe seeking a new refuge, it was reported.

Winnipeg health authorities were seeking to stamp out a widespread but mild epidemic of measles. Altogether between Jan. 1 and May 12 total of 4,695 cases have been reported.

The House of Lords approved in third reading the bill forbidding rodeos. The measure, which had already passed through the commons, was designed to protect animals from unnecessary suffering.

Japan's first official move in the trade deadlock with the United Kingdom was an effort to induce the London government to modify the restrictions recently placed on imports from Japan.

Dr. Stewart Rasmussen Kirk, assistant professor of geology at the University of Manitoba, died at Winnipeg after a protracted illness. He was 35 years old and was a native of St. Andrews, Scotland.

The United States department of commerce issued statistics showing the value of foreign liquors held in bond warehouses to have increased from less than \$5,000,000 Dec. 31 to almost \$10,000,000 at the end of March.

If Canadian and United States wheat crops are reduced by one-third by the recent dust storms, it will be a "godsend," said Hon. Earl Vrooman, former assistant secretary of agriculture in the Wilson cabinet of the United States, in an interview at Toronto.

Citing the rapid decline in the number of cases of tuberculosis in Saskatchewan, Dr. R. S. Ferguson, superintendent of Saskatchewan sanatoria, expressed the opinion that within the next ten years the disease will practically have vanished from the province.

Donald Cameron McGavin, third year arts student at McGill College, is winner of the governor-general's gold medal for general proficiency in the faculty of arts and science at the University of Manitoba. He is the son of Dr. and Mrs. A. McGavin, Carman, Man.

Introduced into Canada in 1900, the Alaska variety of oats soon became recognized as an excellent early variety for Eastern Canada. The very early variety is also recommended for Manitoba, Alberta, and British Columbia.

The total annual production of clovers and grass seeds in Canada has remained about the same in recent years.

END PAIN—Soothe SORE HANDS by Rubbing in

MINARD'S LINIMENT
"KING OF PAIN"

W. N. U., 2047

Gardening

Successive Plantings Ensures Fresh Vegetables Until Late Fall

Doctors have finally convinced the public of the vital necessity of green things in the diet at all times, and experienced gardeners have demonstrated that it is quite possible to produce these green things for at least six months of the year. The whole secret is to make successful plantings of the same vegetables, starting just as soon as the ground is fit to work, with the peas, spinach, radish, cress and lettuce, continuing with these about three times at intervals of ten days and gradually adding carrots, beets, beans, head lettuce, cabbage, Cos Lettuce, Chinese cabbage, tomatoes, egg plants, lima beans, all types of corn with something going in right up to July. Roughly speaking, insect enemies are divided into two groups—those that eat holes in the foliage and those that suck out the juices. For the first-named poison is usually applied, while the suckers are attacked with a burning spray which penetrates their hides. Often when both are present, a combination of poison and something that burns, such as lime sulphur and arsenate, give the best results. The damage from the sucking insects is usually quite apparent, but the presence of the other kind is only shown at first by a withering or withering of the foliage. For sucking pests, chief of which are the aphids or plant lice, spray with white oil soap, a quarter pound of soap to a gallon and a half of water; nicotine sulphate, or "black leaf 40", or any other repellent secured from a reliable seed store. When fungus attacks the plants, the foliage usually turns yellow or brown, or white spots like mildew cover the leaves. Fungus is most common in warm, murky weather. Spraying with Bordeaux Mixture, or dusting with specially finely ground sulphur is advised. Sulphur dust will also protect hollyhocks and phlox from rust, if applied when the disease first shows itself. An ordinary tin can with the top perforated like a salt shaker makes a good duster. Cut worms, which cut through newly set out plants at the base of the stem, are poisoned by spreading sweetened bran mixed with Paris green or special mixtures about the plants. Where there are only a few plants to protect provide some with paper collars.

While it is important to get a portion of seed in early in order to stretch out the season as long as possible, this stretching can also be carried out at the other end of the business. Incidentally for those gardeners who start to sow their seeds too soon there are a dozen people who do not continue sowing late enough. In practically every section of Canada it is possible to continue planting such things as beans, spinach, radish, lettuce, carrots, beets, and corn, right up to July, and if well started plants can be obtained, this late work may include, tomato, cabbage and cauliflowers, too. Of course where the whole garden is put in late, say after the middle of June it would be well to hurry along a portion of it at least with quick acting commercial fertilizers, if possible, water. Cultivation, of course is essential.

When the really hot weather arrives, it is advisable to adjust the lawn mower so that it will not cut as close as it has been doing. Grass grows more quickly in the cooler weather any way so that it will only be necessary during the summer to trim rather than cut. There should be at least one half inch of grass, if not more, after cutting.

Bordeaux Dust
In combating flea beetles, or in treating potatoes for insect enemies, a Bordeaux dust may be used in place of the regular poisoned Bordeaux spray. Such dusts can be purchased from all commercial spray companies ready mixed, or they may be prepared on the premises, provided a good mixing machine is available. The following is the standard formula for Bordeaux dust: Copper sulphate (dehydrated, and ground very fine) 12 pounds; hydrated lime, 80 pounds; arsenate of lime, 8 pounds.—Vegetable Insects Bulletin, Dominion Department of Agriculture.

Destroying More Coffeees
Armando Vidal, president of the Brazilian National Coffee Department, estimated that Brazil's coffee crop for 1934-35 would be 8,000,000 bags, while the carry-over would be 2,000,000 bags. The amount of coffee destroyed to date has been 27, 500,000 bags. It is planned to destroy 5,570,000 bags more on June 30.

London has just received \$2,150,000 as its portion of this year's auto license.

FALSE TEETH

Dr. WERNER'S POWDER

Would you like false teeth to fit so firmly yet comfortably they feel natural—eat, shout, laugh—all day long you can forget about them. Simply apply Dr. Werner's Powder—prescribed by one of the world's foremost dentists—the one powder that assures 100% permanent comfort. SPECIAL FEATURE—comfort-fashion protects sensitive gums—always keeps mouth clean and sanitary. Inexpensive—any drugist.

SPRINGTIME PRINT—AN EXCELLENT MODEL

With splendid aids towards slenderness and length. A model of smart simplicity is this charming dress for casual day wear. What more, it is a style exceedingly becoming. Figures no longer slim. For this season, the matron as well as the younger woman will wear this suit. It is delightfully easy to fashion. Navy and white crepe silk print with crisp white outline finishing the neck made the original model. It can have short sleeves, and is lovely carried out in cotton prints, tub silk, etc., for summer. Size 36 requires 3 1/2 yards of 36-inch material with 1/2 yard of 35-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Little Journeys In Science

VITAMINS

(By Gordon H. Guest, M.A.)

Among the notable discoveries made by scientists in recent years, is that of vitamins. While they are as yet not known to have shape, taste, weight or color, they have been found to be a very necessary part of the diet, and to prevent many forms of disease. They were first discovered to exist in certain foods by medical men who were experimenting with the effect of diet on health. At about the same time, food chemists came upon these mysterious chemicals which could not be classified with fats, carbohydrates, proteins or mineral matter, the known components of food, yet which seemed to have definite life-giving qualities. Work is being constantly done by scientists in many lands, in an effort to find out exactly what vitamins are, but so far they have only been able to classify them according to what characteristics can be observed. As far as is known, vitamins contribute no material substance or energy to the body, but they act as what chemists call a catalyst, that is, they speed up the life processes. Vitamins have been designated by letters in the alphabet, and are:

Vitamin A is found in green vegetables, cod-liver oil and liver, and is growth-promoting. It was once thought it prevented a dread eye disease, but this theory is no longer held.

Vitamin B is found in vegetables, milk, wheat, fruit, Graham flour and yellow corn meal. It is one of the most important members of the vitamin family, for it prevents beriberi, a dread disease contracted by people who live on polished rice.

Vitamin C occurs in fruit and in a small extent in milk. This vitamin prevents scurvy, a disease which formerly took many lives.

Vitamin D occurs in cod-liver oil and it prevents rickets in infants.

Vitamin E is found in meat, the germ of the wheat seed and in numerous other natural foods.

Vitamin G, only recently discovered, is found in some types of yeast and has growth-promoting qualities.

FRETFUL BABIES

Quieted!

"If my three baby boys were restless with colic or nervous from their teeth I gave them a Baby's Own Tablet and they were soon asleep," says Mrs. T. Tweedy, 476 Mill Rd., Toronto. These sweet little tablets remove the cause of fretfulness and the child becomes happy and well again. All the common ailments of little folk are brought about by an inflamed bowels. Dr. Williams' Baby's Own Tablets. Try one at your druggist's.

INSURANCE ON CHURCHILL ROUTE IS LOWERED

Ottawa.—"During the open season of navigation for a well-founded vessel, the risk of casualty is little, if any, greater on the Hudson Bay route than on the voyage to Montreal."

This is not the statement of a western board of trade, or of the On-to-the-Bay Association. It is the considered opinion of the Imperial Shipping committee, of London, and features the fifth report of the committee on Hudson Bay insurance rates in which a reduction in hull insurance rates for the 1934 season is announced.

The reduction is 10 shillings per cent, which means 10 shillings per 100 pounds sterling of insured value. Instead of paying 50 shillings per cent, as they did in 1932 and 1933, which works out at approximately 2½ per cent, shipowners this year will pay 40 shillings per cent, or approximately 3 per cent.

If ships are equipped with gyro compasses they will only pay 30 shillings per cent, or about 2½ per cent.

These premiums will be the minimum charged for the suspension of the British North American warranty clause in all marine hull insurance contracts. The ordinary marine policy permits a vessel to sail the seven seas, with the exception of certain routes which are covered by special warranties. If a vessel desires to enter these routes an additional premium must be paid for the suspension of the warranty.

The fifth report of the Imperial Shipping committee while it announces this reduction in hull insurance rates and forecasts a further reduction if no casualties occur during the present season, does not hold out hope of extending the navigation season. And while admitting that, last year, hull insurance on the bay was six times higher than on the St. Lawrence, the report goes on to say that underwriters do not base premium charges on known facts so much as upon recorded results and the volume of traffic. This refers, undoubtedly, to the loss of the Bright Fan and to the inevitable disparity between the number of ships which use the St. Lawrence and the number which sail into Hudson Bay.

Chief importance of the report, therefore, would seem to be that this is to be expected by way of a longer navigation season on the bay and that in future the tremendously higher insurance rates imposed on the bay route are to be justified by lack of traffic volume and not by navigation conditions. While the report does not actually say so, the language used clearly implies that the committee regards the bay route as safer for shipping than the St. Lawrence.

Marketing Act

Hon. Robt. Weir May Be Minister in Charge of Measure

Ottawa.—"In all human probability," Hon. Robert Weir will be the minister to administer the Marketing Act. This is the information given by Hon. Hugh Guthrie in the House of Commons when pressed by Hon. W. R. Motherwell, former minister of agriculture, who pointed out that the bill itself did not designate the minister.

"For greater convenience," said Mr. Guthrie, "and some elasticity the bill has been drafted in its present form as it is realized that agriculture is not the only natural product involved. I do not think I am going out of my way if I say that we may assume the minister of agriculture will be the man."

Pennyworth To Be Scrapped

Montreal.—Manseau Shipyards, Limited, of Sorel, Que., has purchased the British freighter Pennyworth, it was learned here, and will scrap the vessel. The price could not be learned. The Pennyworth grounded last autumn on the Island of Orleans, near Quebec City, and all efforts to free her proved unavailing.

Crack Distance Flyers

Paris.—France's crack distance flyers, Paul Codos and Maurice Rossi, are considering plans for a race to Los Angeles or San Francisco flight, in an attempt to smash their own non-stop record.

Destroyer Taken Over

Lisbon.—A crew of British tars took over a Portuguese-built destroyer here in behalf of the Columbian navy.

W. N. U. 2047

Boost Tourist Industry

Proposal Is Made For New Cabinet Post In This Connection

Ottawa.—A new cabinet post, that of minister of the tourist industry, was advocated before the senate tourist committee.

The new portfolio was proposed by Morgan Eastman, Toronto, former director of the Greater Vancouver tourist bureau and one of the organizers of the Puget Sounders, a bureau co-operating between Vancouver and Seattle, Washington.

Present provincial tourist activities are inadequate, Mr. Eastman said. The transportation companies are mainly concerned with the prospective tourist traveling by rail, while 75 per cent of the tourists entering Canada come by motor. The bureaus maintained by various cities have a purely local motive. There is not at present a national tourist consciousness designed to boost all of Canada and the separate provinces. These were the reasons given for creation of the new portfolio.

The government has developed some wonderful attractions in our national parks, said Mr. Eastman. But these attractions are not being sold to the extent they should be in foreign countries.

"Why not have a new federal bureau placed under the direction of the minister of trade and commerce?" asked Senator Creelman MacArthur, Summerside, P.E.I.

The Canadian Pacific and the Canadian National Railways presented a joint brief to the committee, based on the present tourist advertising activities of the transportation companies.

The brief was prepared by J. Murray Gibson, general press representative of C.P.R., and C. K. Howard, manager of the tourist and convention bureau of C.N.R.

The railways advanced the opinion that advertising in the United States under the government's own name might react unfavorably, tending to be denounced as propaganda.

Marketing Bill

Mackenzie King Approves Proposed Changes In Act

Ottawa.—A significant statement by Rt. Hon. Mackenzie King that the amendments proposed to the marketing bill by Hon. Robert Weir had met some of his objections to the measure was made in the house.

The Liberal leader went further and suggested that if the government changed the legislation in respect to the powers of the boards to enact regulations and made such power a government responsibility, "as far as I am concerned I would cease to have any opposition to the measure as a measure of an experimental character."

Mr. King stressed that one of the basic things in the British constitution was the control of parliament over expenditures. This principle was ignored in the measure, he said. Expenditures under the bill should be made by appropriations of parliament. Strong exception also had been taken by the opposition, he said, to part two, which left it to a particular group appointed to investigate and determine what was to be an offence.

"I am glad to notice the government had taken account of the force of the exception taken to these clauses," said Mr. King, "and is proposing to make a material change which will meet all that there was in the nature of opposition to that part of the measure. The government is proposing to do away with the word 'examine' and substitute the word 'report'."

"That means that when an investigation is held a report will be made by the investigators to the minister and to the government. The report will be public, and undoubtedly will be serviceable in helping to make more effective the law with regard to preventing the enhancement of prices or the restraint of trade which is unreasonable and unfair."

Northern Flight Record

Edmonton.—A new record was established in northland flying when Pilot Archie McMullen, Canadian Airways, flew into Fort Resolution and returned to Fort McMurray in the afternoon with a load of six passengers and a heavy consignment of furs. This flight is two weeks ahead of the previous earliest flight into Resolution.

Narrow Nationalism

London.—The chief obstacle to the attainment of international security is a spirit of narrow and self-seeking nationalism which refuses to pay the price whereby security and recovery can be achieved, Sir John Simon, the foreign secretary, told the House of Commons.

Withdraws From Commons

Mitchell Hepburn To Devote Time To Ontario Provincial Affairs

Toronto.—Mitchell F. Hepburn, Ontario Liberal leader, announced he would submit his resignation as member of the Dominion parliament to Rt. Hon. W. L. Mackenzie King, Liberal leader.

Mr. King will hand Mr. Hepburn's resignation to the speaker of the house on June 11, the day before the official nominations in Ontario.

"This should set at rest all doubt as to whether I am withdrawing from the Dominion parliament and devoting my whole time henceforward to the leadership of the Ontario Liberal party in the provincial election campaign," Mr. Hepburn declared.

Covered With Dust

Ship At Sea Does Not Escape Prairie Dust Storm

Boston.—The prairie dust storm which swept a large part of the eastern United States, left a blanket of prairie soil on at least one ship, many miles off Cape Hatteras.

Captain Overbeck, master of the tanker F. Q. Barstow, reported to the naval hydrographic office here that during the early hours of last Saturday the ship seemed to be enveloped in a foggy blanket of what seemed like thick salt spray. When daylight came, he found the craft covered with between 1-16 and 1-8 of an inch of dust.

PROPOSAL MADE TO ABANDON ARMS PARLEY

Geneva.—A proposal to abandon the disarmament conference and report its failure to the League of Nations council was tentatively launched by conference leaders.

Although the idea has not been formally presented, it is known to be under consideration by statesmen seeking to inject new life into an ill patient.

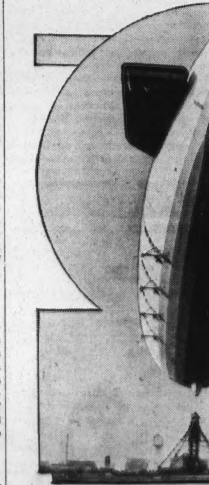

Encouragement for friends of disarmament came at the same time in a statement of France's foreign minister, Louis Barthou, that he had not given up hope of an agreement, and in reports that Germany is considering returning to the conference.

Indications are that the powers are trying to force France to show her hand on the question of guarantees, and that France is trying to induce Great Britain into a pact for mutual military aid in the event that either France or Britain is attacked.

Foreign Minister Barthou's proclamation tended to counter the move for eventual conference adjournment.

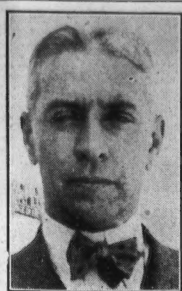

The impression prevailed here that disarmament will continue in a deadlock until the 1935 Saar plebiscite decided whether that area will be returned to Germany, and until Germany herself returns to the conference.

U.S. SOUNDS DIRIGIBLE'S DEATH KNEEL

The pride of the United States Navy Air Force, the giant airship Macon, is pronounced a failure after being unable to defend herself in fleet manoeuvres off Cuba. In addition to her theoretical destruction by aeroplanes, the Macon sustained new actual damage which necessitates repairs in Florida. This is the second occasion in recent weeks that the giant airship has had to put in for repairs, and many believe unless she shows better in her new tests with the fleet, no more airships will be built by the United States. Here we see the Macon swinging in the breeze as she lies anchored to her mooring mast.

MAY HEAD BOARD

Hon. Gordon Harrington, former premier of Nova Scotia and now leader of the Opposition in that province, who is mentioned as a possibility for the post of chairman of the Board of Railway Commissioners. The vacancy was created when Hon. C. P. Fullerton became chairman of the Board of Trustees of the Canadian National Railways.

Canada Not Dumping Wheat

General Manager of Wheat Pools Denies Published Report

Winnipeg.—Denial of published reports that the Dominion government will dump its wheat holdings on the market was made by John I. McFarland, general manager of the Canadian wheat pools.

Rumors have been current among the grain trade for several days forcing selling of government holdings was contemplated.

The Ottawa correspondent of a weekly financial journal reported: "With about three months of the crop year remaining, it is learned here the Dominion government intends to force wheat on the market in order to bring Canada's exports up to the London wheat agreement total of 200,000,000 bushels. Sixty million bushels of Canadian wheat remain to be sold before the end of July and information here is that the wheat will be marketed notwithstanding slight price losses which may result."

Mr. McFarland stated no such policy has even been discussed in Canada.

Lost Race With Fire

San Diego, Cal.—Overcome on a mountain trail in a desperate race from flames fanned by a strong wind, three Seara camp members perished in the forest blaze near Julian. The men, with about 22 others, had reached to safety from flames which threatened to trap them in a gulch.

To Be Deported

Montreal.—The first stowaway of the trans-Atlantic shipping season here is Charles Kinrade, 38, native of the Isle of Man. He landed from the freighter Carmona, out of Newcastle. He pleaded guilty and was sentenced to four weeks in jail, after which he is to be deported.

Saskatchewan Claims

Natural Resources Case Presented To Dymond Commission

Ottawa.—Saskatchewan's claims against the Dominion, growing from federal administration of the province's natural resources from 1905 to 1930, were presented formally before the Dymond royal commission.

The commission has been sitting since February 5, with long adjournments necessitated by hearings in Regina as well as Ottawa. A vast amount of documentary evidence was submitted by both sides previous to the opening of oral arguments.

P. H. Gordon, Regina, chief counsel for Saskatchewan, placed the province's total claim at \$161,626,751. This was made up of a claim for 31,000,000 acres of land the province charges the Dominion with having alienated, with a tentative value of \$4 per acre, a total of \$124,207,460 with interest; loss of taxes, \$2,038,535; loss of grazing rentals, \$1,157,969; loss of timber revenue, \$26,598,276; school lands and school land endowment fund, \$7,127,571.

J. MacGregor Stewart, Halifax, chief counsel for the Dominion, advanced tentative counter claims of \$170,000,000.

The Saskatchewan Act was passed in 1905 only after a great deal of opposition had been smoothed out, Mr. Gordon told the commission.

When Saskatchewan entered confederation, September 1, 1905, the province was not permitted to exercise any rights with respect to administration and control of its resources, he said. The province was thus placed in a position of inferiority with the other provinces.

Advances In Aviation

First Inland Aerial Mail Service In British Isles

London.—Two notable advances in British aviation were announced with the maiden flight of the Scylla, largest air liner in the world, and inauguration of the first inland aerial mail service in the British Isles, to commence shortly.

The Scylla made her maiden flight to Paris. Built for Imperial Airways, she carries 39 passengers, two pilots, a wireless operator and steward. She is powered with four 550 horsepower engines. The passengers are able to dine and hear radio programs.

The airmail service, to open in a few days, will run between Inverness and Kirkwall in the Orkney Islands.

NEGOTIATIONS BETWEEN WHEAT DELEGATES ENDED

London.—Ten days of private negotiations between the big four wheat delegates ended, leaving in doubt the question whether Argentina can be prevented from breaking the 1933 wheat agreement.

A report of the deliberations was being sent to the governments concerned, including Canada, the United States, Australia and Argentina.

It was indicated the report includes a tentative compromise arrangement under which no set amount would be loaned to Argentina on her quota under existing wheat export agreements.

It was known that during final sessions a firm demand was presented that Argentina reform its wheat sales practices before getting a bigger slice of the world wheat market.

Representatives of the Dominions and the United States were said to have stood pat on their insistence that Argentina must curb her alleged dumping. Dr. Thomas Le Breton, head of the Argentine delegation, came here May 6 in the hope of obtaining a 40,000,000 bushel loan.

In Motor Accident

Sir Austen Chamberlain Bruised And Badly Shaken

London.—Sir Austen Chamberlain, former foreign secretary, was bruised and badly shaken up as the taxicab in which he was riding collided with another cab in Grosvenor square and overturned. Examinations showed no bones were broken.

Lord Dawson of Penn, the king's physician, happened to be passing at the time of the accident and stopped his car to render aid. He was surprised to recognize the victim as Sir Austen and took him to his home.

A bulletin from him said: "Sir Austen was badly shaken and a great deal bruised when his taxicab was run into and overturned. Fortunately no bones were broken."

SEEK EVIDENCE FOR GRADE ON GARNET WHEAT

Ottawa.—Further evidence will be taken by the agricultural committee of commons before it reaches a decision as to the separate grading of Garnet wheat.

On the advice of Hon. Robert Weir, minister of agriculture, and endorsed by Hon. W. R. Motherwell, former minister, the committee took the view that absolute evidence of the necessity of such a change should be provided the thousands of farmers growing Garnet wheat before new grades should be insisted upon.

A sub-committee composed of A. M. Carmichael (Prog. Kindersley), W. H. Loucks (Cons. Rosemont), E. E. Perley (Cons. Qu'Appelle), John Valleron (Lab. South Battleford), Hon. Robert Weir, Hon. W. R. Motherwell, P. G. Davis (Cons. Athabasca), was appointed to decide on the evidence to be submitted. At the opening of the meeting Hon. H. H. Stevens, minister of trade and commerce, who is sponsoring the bill for separate grading of Garnet, stated he was leaving the measure in the committee's hands.

Mr. Motherwell strongly opposed the bill. He did not go into the merits of Garnet wheat, reserving that for a later occasion, but he protested leaving the fate of Garnet wheat with the grain standard board, as he said the bill proposed. All the members except one on the board came from southern districts that did not grow Garnet wheat. The one member from northern districts was a grower of Reward, so Garnet had no representation on the board.

Mr. Weir, as at the former meeting of the committee, opposed any step to give Garnet a separate grading until there was proof that it was necessary. He dealt with the claims that Garnet was injuring Canada's wheat sales. At present Garnet is allowed in number two northern and in lower grades, but is not allowed in number one northern.

Ontario Elections

Premier Henry Announces Voting Day June 19th

Toronto.—The Ontario general elections will be held June 19. Official nominations will be held June 12 and advanced polls on June 16 and 18.

Premier George S. Henry announced the dates and also dissolution of Ontario's legislature. Premier Henry made his brief announcement from the open window of his automobile as he left Government House. He had been conferring for 20 minutes with Lieutenant-Governor Herbert A. Bruce.

The lieutenant-governor signed the order-in-council providing for dissolution of the legislature and issuance of the writs. Premier Henry did not issue his election manifesto.

For three days Premier Henry and his cabinet have held conferences discussing the election date and preparing the Conservative manifesto. At the conclusion of the conference, the election date was forthcoming.

For weeks party heads have been campaigning in preparation for the vote. Premier Henry and his cabinet ministers have delivered addresses at numerous nomination meetings, and Mitchell F. Hepburn, Ontario Liberal leader, has waged a busy campaign.

Saskatchewan Elections

Voters To Go To The Polls On June 19

Regina.—Saskatchewan voters will go to the polls Tuesday, June 19.

The date of the provincial election was officially announced by Premier J. T. M. Anderson. It will be the same date as the provincial vote in Ontario.

Election writs will be issued this week, Premier Anderson said, with Tuesday, June 12, official nomination day. Advance polls will be held Friday, Saturday and Monday, June 15, 16 and 18, respectively.

Heads Pasteur Institute

Paris.—Dr. Louis Martin, one of the world's foremost authorities on contagious diseases, was named head of the Pasteur Institute. For 40 years Dr. Martin has been associated with the institute.

Will Build Submarines

Washington.—The \$40,000,000 item for the United States navy, President Roosevelt included in his latest budgetary request to congress will be turned to the construction of submarines and destroyers.

Use Wheat As Cash

Manitoba Measure Calculated To Benefit Farmers And Their Creditors

Wheat instead of money now can be used as a means of settling farm debts in agreements between debtors and creditors under the Debt Adjusting Act. The legislators of Manitoba so decided during the recent session. When they put it up money as a sole means of settling farm debts and went back to natural wealth born out of the soil and the sunshine and the rain of the prairies, the legislators presented the debt commissioner with a powerful weapon to force settlement of debts, say the legal experts.

No legal compulsion to use Manitoba grain as a medium of debt settlement is contained in the new law, the lawyers point out. But those who refuse can be hit hard in two different ways by the debt adjustment commissioner, Gerald Rutherford. He can say to the creditor: "You can have no certificate to foreclose if you won't accept grain instead of money," and say to the farmer, "Unless you agree to make payments out of the grain you grow the mortgage can foreclose."

They do not have to do this, of course, it is pointed out, but it can be made very inconvenient for them if they do not. For short this is called the bushel plan. As an example, a farmer's debt might be specified as 4,000 bushels, at say, 80 cents a bushel. He would be given a stated period in which to pay. As a stated period in an illustration, four years.

People whose curiosity has been pricked by this law have protested that it might prove to be unfair to either one of the parties concerned at the price of wheat is notoriously inclined to scamper up and down a scale. But the reply is that they both take a chance. It might prove very advantageous to the creditor and it might let the farmer off very easily. They say it is a sensible arrangement at a time when money is scarce in the wheat fields. And an obvious retort of defenders of the bushel plan is that it stabilizes wheat as an eternal verity. Money they say and not wheat is really the thing that slides up and down.

Holstein Cattle Price Higher

Improvement Seen In Export Trade And Home Market

The price of Holstein cattle has steadily been improving for the past six months, and further improvement may be expected to follow in the near future, according to the extension department of the Holstein-Friesian Association of Canada, the director of which points out in a statement just made public, that since the first of January the export trade has been averaging about three carloads a week, while during this same period of time the home market has been absorbing more cattle than usual, as indicated by transfers put through the secretary's office, the number issued for the first four months of the year being five hundred more than were recorded in January, February, March and April of 1933. This big transfer business covering sales is being regarded by the association as showing that farm conditions are gradually getting better, and justification for assuming that from now on the trend will be in the direction of lifting values to a higher level.

In connection with the export trade of the association, several shipments have been made to England, more than 800 head sent to the United States, and when navigation opens in the inland ports a consignment of young bulls will be sent to the British colony of Demerara in South America.

The work of blood testing for the control of Bang's disease is still being carried on by the extension department, which reports having nearly two hundred herds under the Federal policy at the present time.

Experts Are Puzzled

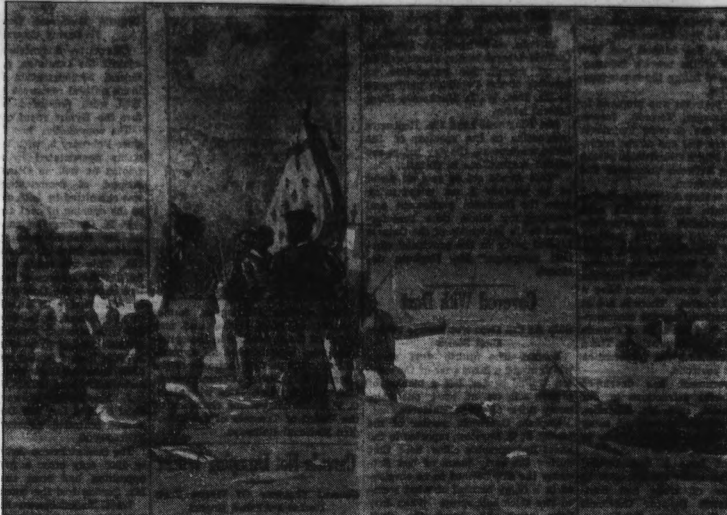

Experts from Harvard University have been studying Harry Kolombatos, 7, who was discovered by his teachers reading his class books upside down just as well as right side up. Discovery of the lad's odd knack was made by teachers at Ira Allen grammar school at Roxbury, Massachusetts.

There are about 100 different commercial explosives in common use. These range from black powder to blasting gelatin, the most powerful.

According to records, quicksands swallowed 13 warships one night in 1703.

W. N. U. 2047

CARTIER AT PERCE ROCK, GASPE, GULF OF ST. LAWRENCE—JULY, 1884.

This is a year of anniversaries for Canada. A national committee has been appointed to direct the celebration of the anniversary of the first landing of Jacques Cartier, near Perce Rock, Que., 400 years ago. In the Maritime Provinces, Quebec, Ontario, and even the Western Provinces, the famous Toronto celebrates its 100th birthday, and many other towns and cities plan special festivities to mark the rounding out of a century of progress. The picture above is from the original painting of J. D. Kelly, in possession of the Confederation Life Association, and shows Jacques Cartier as he reached Perce Rock, Gaspé. The scene depicted is the artist's conception of an event that very well may have occurred on July 12th or 13th, 1534, as Cartier spent part of both days anchored in the vicinity. Perce Rock is shown as it probably appeared in 1534, not as it appears at present.

Where Tipping Is Lavish

Servants In China Always Expect Generous Pay From Visitors

An investigation of social usages in Shanghai reveals the fact that even wealthy Chinese families pay their servants only one-third or even one-fourth of the wages paid by the average foreign family. A Chinese family, for instance, will pay only \$12 a month for a good cook, but a foreign family will pay from \$30 to \$45. The Chinese habit of tipping lavishly accounts for the difference in the wage scale. No guest in a Chinese home ever thinks of leaving without handing out a "cunshang" or tip—the money usually being wrapped in red paper for good luck.

At lavish feasts the guests are supposed to tip from \$2 to \$20, the money being handed either to the master or mistress of the house for distribution amongst the staff of servants. Chinese hosts make a habit of sending their own rickshaws, carriages or automobiles for their guests, and the guests are supposed to hand rather lavish tips to the rickshaw puller, the coachman or the chauffeur.

At most Mah Jongh parties a special ash tray is prominently displayed into which the winner of each game is supposed to put 10 per cent. of his winnings. The host or hostess will first take enough money from the ash tray to pay for the cigarettes and sweet-meats consumed, and will then hand the rest to the "No. 1 Boy" for distribution amongst the servants.

It is a gala day when the master of the house sends out a wedding gift. The recipient must pay the bearer 10 per cent. of the estimated value of what he receives; if the tip is small, the servant reports to his master, and the master will be deeply offended at the implication that he sent a cheap present.

Canadian Hog Quality Increases

Statistics alone do not reveal the benefits which have been derived from hog grading. The general quality of all hogs has been improved because of the greater attention which has been paid to principles of breeding and feeding, and any retrogression in the quality of Canadian hogs now would have to be deliberately sought after, as the grading data compiled each year entirely eliminates any carelessness in production which might be attributed to ignorance. Hog Handbook, Dominion Department of Agriculture.

"Why, Betty," said a mother to her four-year-old daughter, "you should be ashamed to come to the table with such dirty hands. You never saw my hands like that."

"No, I haven't," admitted Betty; "but I suppose my grandma has."

"Maud is sorry now that she took Jack's ring back to the store to be valued."

"The jeweller kept it. He said that Jack hadn't been in to settle for it according to his promise."

Praise For Canadian Cheese

Texture Superior To New Zealand Product Says Scotch Dealer From as far away as New Zealand and Scotland comes evidence of the high regard in which Canadian cheese is held. The main criticism to which New Zealand cheese is subjected has to do with openness of texture which has some connection with the pasteurization of the cheese milk.

In the United Kingdom this is fairly well-known as is the fact that Canadian cheese is not subject to this criticism. This was borne out by the following letter which, in part, appeared in the New Zealand Dairyman:

Alex Wight, Carnoustie, Scotland, writes: "As one who has handled cheese for many years I was unaware that Canadian cheese was troubled with openness; I have yet to find one, but it is most difficult to get a New Zealand cheese that isn't, and two days after cutting it is all cracks and moulds, and for this reason I had to stop handling it. I push New Zealand butter and think it the best in the world, so go ahead and make your cheese the same, but don't imagine you can teach the Canadians anything on cheesemaking."

Highway To Alaska

With the Pan-American Highway from Canada to Santiago, Chile, nearing completion, interest has turned toward a road from the United States to Alaska. A British committee, after studying the project for three years, has recommended the construction of a highway from Seattle, Wash., to Fairbanks, Alaska, a distance of 2,250 miles, 1,183 of which would be in Canada. The estimated cost of the new link is about \$14,000,000.

A flock of hens produce, in egg shells, about 137 pounds of chalk annually.

Smutty Grain Found

Survey Reveals Serious Proportion Among Seed Samples Used

A caution to farmers that a survey has revealed a serious proportion of smutty grain among samples of seed being used this spring comes from Nelson Young, of the Dominion seed branch, at Saskatoon. The situation is ascribed to lack of seed treatment.

The proportion of smutted seed has definitely increased officials declare. There is a considerable variation in the amount of smut in grain from different districts, that from the southwest of the province being least infected.

The usual treatment for smut consists in spraying with or dipping in a solution consisting of one pound of commercial formaldehyde solution to 32 imperial gallons of water. Wheat and barley can be sprayed satisfactorily. Oats require dipping for best results. Some farmers prefer the copper carbonate treatment in which the wheat is not moistened.

New System Amusing

Three-Letter Initials For British Auto Owners Has Funny Side

Introduction of a three-letter initial system for automobile license plates is having amusing consequences all over Britain. Owners of shiny new 1934 cars are finding themselves saddled with fore and aft plates bearing such unflattering suffixes as BAD, CAD, DRY, EGG, ALF, and BAR.

But it is in Oxford, mighty seat of British learning, that the auto owners are coming off worse. Under the British system of licensing, in which different districts are allotted various initials, Oxford motorists are going around with cars labelled DUD.

Stamp collectors in the United States average three per square mile.

Renovating The Lawn

Methods Used For Restoration Of Winter-Killed Spots

Lawns, as everybody knows, require a great deal of care, especially this spring when a long and hard winter has left its toll in the shape of brown patches, scald, snow mold, and winterkill. For the renovation of these unsightly spots, as well as for the restoration of old, worn-out lawns, the use of a good fertilizer is imperative, and it is well to remember that in seeding, either for the renewal of old patches or for making a new lawn, a calm day should be chosen. There are many effective commercial fertilizers and satisfactory grass mixtures sold by seedsmen, but a very good grass mixture for Canada can be made of four parts Kentucky blue grass and one part Red Top. Three to four pounds of this would cover 1,000 square feet. If it is desired to add white clover for patching purposes, one-eighth part should be added to the above mixture, always remembering that white Dutch clover will not grow on acid soil.

In the restoration of brown or bald spots on the lawn, the home-beautifier cannot do better than follow the method of a well-known Canadian horticulturist who is famous for lovely lawns in his Ottawa home. First of all he rakes the bare spots clean, and, if necessary, adds a modicum of good soil. He sows the seed, rakes it gently into the mould, rolls it, and takes great care to keep the bald spots moist, as indeed he does to the whole of the lawn. The slight raking and the rolling brings the seed and the soil into intimate contact, thereby ensuring rapid germination. By the time the grass is three or four inches high, it will have sufficient root-hold to withstand the operation of the lawn-mower. In common with the rest of the lawn. For the first cutting of the new grass on the erstwhile spots, the machine is set rather high. The blades should be very sharp and well set to avoid pulling out the young grass. As a rule, however, the lawns of this horticulturist stand the winters well, because in the late fall, October, he takes the precaution to spread fertilizer (bone meal or commercial sheep manure) and thoroughly roll the lawn. If necessary at this time, he may give his lawn a sprinkling of seed, followed by heavy rolling.

A New Anaesthetic

A new anaesthetic has been discovered at Sinai hospital, Baltimore, Md., which, according to the inventor, produces no ill after-effects to the patient. It is a white powder dissolved in water which is injected into the patient's arm and acts so rapidly that sleep is produced in 20 seconds or less.

More than 2,000 musical instruments made by primitive tribes are in the collection of the Smithsonian Institution, in Washington, D.C.

As a rule, sharp business men are rather blunt.

Power Created By Universe

Feasible To Suppose Man May Find Way To Use It

A vision of engineless trains driven by electricity transmitted by radio short wave crept into the news the other day. There had been an experiment on the Santa Fe. Two hand cars constituted the train, which carried eight passengers. The experimental run covered seven miles. And that is about all that got into the news. Nothing was revealed of the transmitting or generating mechanism. It appeared, however, that the inventor was sufficiently encouraged to declare that an apparatus capable of developing 1,000 horsepower would be constructed. And that was that.

But one wonders what that may become. Of course, we have known the possibilities of remote control for many years. The robots have done many strange things. They have started, moved and stopped automobiles. They have likewise moved great war vessels. They have flown airplanes. But this engineless train seems to be something else again. It is a transmission of power to a movable object which in itself is without power. These other robots have merely used or ceased to use power ready for use.

The engineless train, if there is anything in this fragmentary information, may be said to be an approach to the scientific dream of man's discovery of ways by which he can at will pick up power out of the universe. True, what is now sought is transmission of created power without a fixed and immovable agency for transmission. But if that is attained, what is more logical than to anticipate the time when power shall be picked out of the universe as it is created by the universe and we want it?

Tradition has it that the ancient Atlanteans had flying machines in which they circumscribed the globe, gathering from the atmosphere the power for propulsion as it was needed. No one knows much about the Atlanteans or how they lived or what they had. If there were once written records of them they long since disappeared. So did they themselves and the early continent they are credited with inhabiting. But fragments relating to them have come down through the centuries. This one—of possession of the secret of taking power from the surrounding forces of the universe—is one of them.—Buffalo Courier-Express.

Roses For The Prairies

Best Of Varieties Grown Most Successfully In The West

The following list of varieties of roses most useful for the Prairie Provinces has been prepared by the superintendent of the Dominion Experimental Station at Morden, Manitoba: Hardest varieties—Banane, Hana, Stanwells Perpetual, Tetonkaha, F. J. Grootendorst, Pink Grootendorst, Rosa Hugonis, Rosa Rugosa, Rosa Rugosa Kanchanka form, Persimmon Yellow, Harrison's Yellow, or Scotch Yellow, Rosa Blanda hybrid, named "Betty Bland", Rosa Polyantha hybrid, Mune. Planter, Mune. Blanc double de Coubert, Belle Poitevine, Conrad F. Meyer, Rosa Spinosa, Agnes Emily Carr, Mrs. George Brunt, Amelia Graveureaux, and Rugosa hybrids.

Hybrid perpetuals and hybrid tea roses which proved fairly hardy at Morden after three years trials are: Capt. Hayward, Capt. Christy, Mrs. John Laing, Gen. Jacquemont, Gloire de Chedane-Guineoise, Alfred Colomb, Gruss an Teplitz, Hugh Dickson, Mune. Edouard Herriot, Mune. Caroline Testout, Baroness Rothschild, Duke of Edinburgh, Agnes, Wm. Lobb (Moss), Jules Margottin, and Magna Charta.

Was Quick Thinker

Apt Remark About Letter Made By Famous Minister

Henry Ward Beecher, the famous American minister, would constantly open letters addressed to him at his church during the service. The contents, he would read out to his congregation, often basing his discourse upon them. One day, he opened a letter in front of the worshippers, and found that it only contained the word "Fool." He read it out, as was his custom; remarking afterwards, "I've often known a man write a letter and forget to sign his name, but this is the only instance I have ever known of a man signing his name and forgetting to write the letter."

According to prevailing estimates the Canadian sugar beet acreage in 1933 was about two per cent. lower than in 1932.

FANCIFUL FABLES

Best for You and Baby Too

OCCASIONAL WIFE

By
EDNA ROBB WEBSTER
Author of "Joretta", "Lipstick Girl" Etc.

SYNOPSIS

Camilla, Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young, struggling sculptor trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she comes of age and so is studying commercial art in the hope of landing an agency job. Others in the story are Avis Werth, another wealthy girl who is trying to win Peter, Sylvia Todd, Peter's model, and Gus Matson, his former roommate with whom he has quarrelled. After a party at an exclusive club, when the rest of the members of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awake it is early morning and Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Camilla urges Peter to accept some of her earnings to help him along, but Peter refuses and says he will support her. Camilla has gone from the studio, Avis Werth calls and persuades Peter to accept a loan of \$1,000. Peter and Camilla are reconciled. Avis invites them to a party, at which she introduces Peter to well-known artists and public men.

(Now Go On With The Story)

CHAPTER XLIV.

"A title is always very important," Avis observed, and turned to Camilla. "Don't you think so? It has so much to do with the success of a book or play or picture. And it does with a piece of sculpture, also. It should strike the public's imagination, as well as being appropriate to the subject."

"Of course," Camilla agreed. She reflected that she probably knew more about that than Avis did. "Wasn't that her objection to the work—to attract the public eye with a few well-chosen words? 'Have you anything in mind?'"

"Several," Peter nodded. "But I've been so busy getting the unnamed thing finished that I haven't given it much thought. No use to have a name, however alluring, without an object to go with it."

"I had an idea the minute I saw it," Avis explained. "Just the one word, 'Inspiration' seems to me to fit it exactly. What do you think of it?"

Camilla repeated the word thoughtfully. "It sounds rather well," she hesitated.

Avis recoiled instantly. Her displeasure over Camilla's semi-enthusiasm was almost visible. She turned to Peter confidently. "Don't you like it better, the more you hear it? Doesn't it sort of grow on you?"

"I believe it does," he admitted, then turned to Camilla. "Have you a suggestion, dear? The committee is open to any new idea, and anxious for one."

"I've thought a lot about it," she confessed, smiling. "I have a list of ideas written down at home, but the best one I have thought of is 'Eager Youth'."

Silence for a moment, dominated by Tillie's clashing of china and silver in the kitchenette. "Say, that's hot, all right!" Peter exclaimed. "Well, you say little critter—and a whole page of titles topped by a prize win."

For EASIER Dyeing . . .

The new Instant Rit is easier to use than any other tint or dye you ever used. It dissolves completely in 40 seconds. It's so easy to use that it makes a brilliant, even-toned finish. . . . and lasts and lasts and lasts.

YOU'LL HAVE "BETTER LUCK"

WITH

NEW! No longer a soap! Dissolves instantly.

ner and you haven't said a word!"

He was immensely pleased.

"I was waiting for you to tell me your own ideas first, so you wouldn't be influenced by mine," Camilla explained quietly. "I wanted the whole thing to be yours, title and all, unless you got stuck and I could help you out."

"Gosh!" he enthused. "Am I in luck to have two women working their clever brains to name my stuff. It ought to be good!" He turned to Avis. "What do you think of that one, 'Eager Youth'?"

"Very good," she agreed instantly, but she thought to herself, "I'll handle you, alone."

"Anyway," Peter decided, "we have another week to think it over. It won't take long to scratch the title on when it's finished. Both of you keep up the good work and we'll vote on the final selection."

Camilla remained with Peter for what was left of the night, but it was only four hours later that she reluctantly left him to his work and returned to her own apartment for a busy day of routine tasks, preparing her clothes for the following week and an afternoon nap that refreshed her for the evening, when Peter came to take her to a movie.

It was entertainment which permitted them to relax as that of the previous evening had not done; and although they were in a crowded theatre, they might have been entirely alone for the two hours in which they sat close together in the darkness and watched the tragedy of human emotions on the screen evolve into the miracle of happiness.

Their own emotions had been tense in the crisis of those make-believe lives, and it was with relief that they witnessed the final dissolution of all strife and misunderstanding.

"They always live happy ever after," Peter laughed.

"They should after all that effort to deserve happiness. Not all stories end happily, but I like them a lot better when they don't, don't you?"

"I guess everyone does. Still, you remember the tragedies longer. I guess that is why a few authors dare to leave them that way. True to life, too. There are plenty of real tragedies in real life that never end in happiness."

"Yes, and the saddest ones are those we never know about. Sudden death, murder, failure, are not the real tragedies. The worst ones are lived behind smiles and service, in silence. But we are going to have a happy ending," she added cheerfully and confidently.

"You know it," he affirmed quickly. "At least, we are going to give the controllers of destiny a fair struggle, I think."

"Just imagine, Peter, you may be in Paris in less than two months," she reminded him wistfully.

"I doubt it. If I'm not, I'll be earning some real money, though."

Always, the human mind is forced to measure achievement in financial terms, because the world rubrically demands that "with the same measure that ye mete without it, it shall be measured to you again." Each man measures his neighbor's success by that standard, by which the world judges him in return. It is no more fair than the scale of civil justice, but it is irrevocable. Effort and talent are cast into the discard for the glittering display of possession.

Camilla experienced her first measure of tangible achievement when she arrived at the office on Monday morning and Margaret Blaine greeted her with:

"Have you seen the new issue of Weekly Review? Your Tiny Tots scamper all over the centre double spread."

She held out the magazine. A strange exultation rose up in Camilla's breast and she seemed to soar in the air like a flying bird. Her shining eyes just looked at the droil little figures. She could not speak.

"Well, aren't you thrilled to death to see them for the first time in actual print?" demanded Margaret. She was secretary to Mr. Weeks and held a profound respect for creative talent.

"Of course, I am," Camilla confessed. "But what shall I do about it?"

"Say, if that was my stuff, I'd make whoopee like an Indian—well, I don't know what I would do."

"That's just about the way I feel. That is why I don't do anything at all. They do look darling, don't they?" she asked fondly, quite as if anyone else had created them and she was admiring them.

"Do they? If that ad doesn't make the kids notice and demand Wheat-hearts, nothing will!"

"I hope you are right," Camilla said quietly. Again the standard of success confronted her. Her work would be praised or condemned according to the measure of its return measure in gold to her employers. Margaret's opinion did not make it good, nor the opinion of any critic.

If Past 45 and "Low" and Upset Look for Acid Stomach

HERE ARE THE SIGNS:
Nervousness, Frequent Headaches, Loss of Appetite, Indigestion, Stomach Aches, Nausea, Sour Stomach, Auto-intoxication

WHAT TO DO FOR IT:

TAKE—A teaspoonful of Phillips' Milk of Magnesia in a glass of water every morning on an empty stomach. Take another teaspoonful 30 minutes after eating. And another after supper. The new Phillips' Milk of Magnesia—now listed for each continent—is directed above.

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts at once to neutralize the acids that cause headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia. Phillips' Milk of Magnesia Tablets when you buy—20c and 50c sizes.

Phillips' Milk of Magnesia

Each tiny tablet form contains 1/20 of an ounce of Phillips' Milk of Magnesia. MADE IN CANADA.

But if that sickie composite mind that is known as public opinion, chose to favor her work with its passing approval, her work would then turn to gold for her employers and, in turn, gold for her—and her work would be good!

Camilla telephoned to Peter during her lunch hour. "Have you seen the new Weekly Review?" her voice sang with exuberance.

"No, I haven't."

"Well, rush out and get a copy and feast your eyes on that middle spread, done by your very own wife."

"Will I! Congratulations, darling. I'm terribly proud of you. When do we celebrate?"

"When you finish the figure. Then it will be a double celebration for the famous Ansons."

"How famous?" he laughed. "Just among ourselves, for awhile."

"Okay, honey. I won't lose a minute getting that magazine, you can bet. I'll call you back later, and tell you what I think of this new Anson artist."

Camilla accomplished little work that day. Every employee and executive had to compliment and comment upon the initiation of the Tiny Tots into the world of affairs at large and advertising in particular. Each was optimistic regarding their popularity, and Camilla walked again on winged feet with her head in the clouds of hope.

Her elation was not obvious. If possible, she was more quiet and reserved than usual. For deep emotion is not expressed in sounds and actions. It is lived within the heart and soul. Only superficial emotion manifests itself in violent demonstration.

(To Be Continued)

Planes To Visit Toronto

British Air Force Sending Four To Centenary In July

A fleet of four planes of the British Air Force will take part in the Toronto centenary celebrations in July, it was announced in the House of Commons by Sir Philip Sassoon, Under-Secretary for Air. The machines will be the Hawker Fury, the standard interceptor fighter of the Royal Air Force. They have a top speed at 15,000 feet of 214 miles per hour, and are extremely fast climbers. They are all-metal biplanes with a Rolls-Royce Kestrel engine.

It has been found that aluminum becomes stronger in the bitter colds of high altitudes.

Love is blind, marriage is a skillful occult says the Brandon Sun.

Spain has excellent scenery for exterior cinema films.

MATURITY—MATERNITY

MIDDLE AGE

At these three critical periods a woman needs a medicine she can depend on. That's why so many take Lydia E. Pinkham's Vegetable Compound. 98 out of 100 say, "It helps me!" Let us help you, too!

VEGETABLE COMPOUND

Squaring The Circle

Lawyer Claims He Has Solved Most Baffling Problem

The most baffling mathematical problem in history, which beat even Pythagoras—how to square the circle—said to have been solved at last. Milan Popovitch, a middle-aged lawyer from Nish, claims that he has done it. He started struggling with it as a schoolboy. He continued his efforts when a prisoner of war. He has been at it ever since—in the spare time he could wrest from his professional duties. Reports that an American mathematician had left a considerable fortune to anyone who could solve the problem, spurred Mr. Popovitch on in his efforts to work out this outstanding proposition. Now, at last, he declares that he has found the solution, but before he will disclose his formula, he makes a demand that a commission, appointed by the executors of the American's will, shall examine him and be convinced that the circle has really been squared.

Tenants Steal Building

Remove It Piece By Piece To Spite Landlord

Charged with stealing a building, several tenants of a row of flats have been arrested in Khodel, Poland. Back of this is a case of revenge against the renter's landlord. Following a long series of clashes between the occupants and the owner, the tenants got together and decided to steal the building. Stone by stone, door by door, window by window they removed the flats several miles away and reconstructed them. Calling to collect his rents the landlord found an empty space where his flats had been. He aroused the village and a search was started. After several days the flats were found. Inside were the tenants, enjoying life without the shadows of a landlord's calls. The irate owner had them arrested, but is puzzling how he will get his building back where it belongs.

THE RHYMING OPTIMIST

By Aline Michaels

LIKE LAND-LOCKED SHIPS

When at the wharf I stand and watch the ships

Take on the cargoes waiting at the shore,

See yawning hold and giant crane

At its load one moment, then swings

Back for more,

I sense an emptiness to be away.

Its echo rings through every foreign

shore;

Both ships and sailors ache for wind

and spray

And open seas to greet them, thrusting

hate.

A kindred hate throbs sometimes in

my breast.

The years' strait shores press close

around my heart.

Too long at anchor chained, too long

at rest,

With all my cargo now I would

depart.

Like land-locked ships, I would sail

back to sea,

Return full-freighted to eternity!

Game Increase In Rockies

Noted Guide Reports Larger Herds Of Goats And Deer

Big game animals are increasing in number in the hunting areas outside of the boundaries of Jasper National Park, according to reports from park wardens and from hunters, received by C. K. Howard, head of the tourist department of the Canadian National Railways, Montreal, which handles hunting and fishing activities in the Dominion.

Jack Brewster, noted big game guide and outfitter of Jasper, reports that in two trips with hunting parties last fall he encountered 1,154 big game animals, including bunch of 104 Rocky Mountain goats and 87 bighorn rams in addition to caribou, moose, deer and other game. Both parties of hunters secured full bags of trophies without difficulty.

A new bait for grasshoppers is being tried out by the U.S. Department of Agriculture, oil being substituted for molasses in mixing the bran and arsenic. Oil baits, it is stated, do not deteriorate during storage as rapidly as molasses. In Canada, water-mixed bait has been found to have a distinct attractiveness to the insects, because grasshoppers like to drink when they eat.

Delias, the triangular shaped areas of land deposited at the mouths of rivers, are so named because of their resemblance to the Greek letter Delta.

Quick Relief Now From Neuralgia

JACK, I'M TO BE CLARK ABOUT THAT BIG ORDER IN 40 MINUTES AND I HAVE TERRIFIC NEURALGIA... WHAT CAN I DO?

DON'T WORRY! GET SOME ASPIRIN. TWO TABLETS WILL STOP THAT PAIN IN A FEW MINUTES.

LATER
WELL, JACK, I GOT THE ORDER! YES, BUT IT'S A PIDDLE... YOU BET, I'LL ALWAYS GET ASPIRIN WHEN I WANT QUICK RELIEF FROM PAIN.

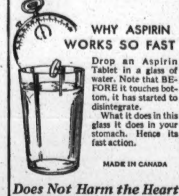

Read ASPIRIN Starts Taking Hold in Few Minutes

Now comes amazingly quick relief from headaches, rheumatism, neuritis, neuralgia... the fastest safe relief, if it is used, get it done.

These results are due to a scientific discovery by which an Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of two seconds after touching moisture. And hence to start "taking hold" of pain a few minutes after taking.

The illustration of the glass, here, tells the story. An Aspirin Tablet starts to disintegrate almost instantly you swallow it. And then it is ready to go to work almost instantly.

When you buy, though, be on guard against substitutes. To be sure you get ASPIRIN's quick relief, be sure the name Bayer in the form of a cross is on every tablet of Aspirin.

Does Not Harm the Heart

Cunard Sailings

Initial Trans-Atlantic Trips Marked By Heavy Passenger Lists

The St. Lawrence service of the Cunard and Anchor-Donalson Lines opened recently with the arrivals and departures of the Aunonia and the Athena. The Aunonia made her first appearance early in May and from now on, these companies will maintain practically a weekly service to Plymouth, Havre and London and Belfast, Glasgow, and Liverpool, throughout the summer and autumn until the close of the St. Lawrence.

Liners on this route will, beside those mentioned, include The Celtic, Aunonia, Aunonia and Aunonia.

The initial departures have been marked by heavy passenger lists in all classes and this, with the advance reservations already made up summer sailings, would indicate that it will be a good year for trans-Atlantic business.

Slight increases in exchange rates in certain European countries have been more than offset by falling prices abroad; the many lands, hotels and railways have reduced their tariffs by as much as half.

Indications are that this will also be a good cruise year. Last winter the veteran Mauretania in her all-white dress and with her gaily decorated rooms, enjoyed enormous popularity in her West Indies' cruises from New York. After being newly furnished, she will make similar short "sea-breeze" cruises to the West Indies from New York, commencing July 21.

On June 26th the Carinthia will make a cruise from New York to the North Cape and Russia. Short cruises to the Saguenay, Quebec, Monney Bay and Bermuda will also be made on the California, Transylvania and Franconia, some cruises including a call at the Bay of Islands in Newfoundland.

One of the most popular cruises will probably be that made by the Franconia on September 18th from New York, to South America. Under the joint management of Theo. Cook & Son, American Express Co., and the Cunard Line, this cruise will carry hundreds of Canadian and American pilgrims to attend the Eucharistic Congress being held this year in Buenos Aires. Calls will be made in Havana, Trinidad, Rio de Janeiro, en route to and from the Argentine Capital.

The popularity of the short cruise in Britain has been phenomenal. This year will see an extensive programme of such sea excursions from Liverpool, Glasgow, and Southampton to the Atlantic Isles, and the Mediterranean and around the British coasts.

Looks Like Prosperity
If innumerable 10 and 20-dollar bills are a sign of prosperity, then they are in Nova Scotia at least. Sydney merchants, restaurant proprietors and insurance companies have been kept on a constant trek to the banks to change the yellow-backs proffered by their customers for bills of smaller denomination.

Great Salt Lake in Utah is more than four times as large as the Dead Sea.

There are at least 60 stars to every man, woman and child on earth.

Little Helps For This Week

"Obey my voice and I will be your God and ye shall be my people; and walk ye in the way that I have commanded you, that it may be well unto you." Jeremiah 7:23.

And oft, when in my heart was heard Thy timely mandate, I deferred The task, in smoother walks to stray; But Thou I now would serve more strictly, if I may. —W. Wordsworth.

Pray Him to give you what the scripture calls "an honest and good heart," or "a perfect heart," and without waiting begin at once to obey Him with the best heart you have. Any obedience is better than none. You have to seek His face, obedience is the only way of seeing Him. All your duties are obediences. To do what He bids is to obey Him, and to obey Him is to approach Him. Every act of obedience is an approach, an approach to Him who is not far off though He seems so, but close behind this visible screen of things which hides Him from us. —J. H. Newman.

As soon as we lay ourselves at God's feet we have enough light given to us to guide our own steps; as the foot-soldier who hears nothing of the councils that determine the course of the great battle he is in, but hears plainly enough the word of command which he must himself obey.—George Eliot.

When Accidents Happen
Fatal Hour For British Road Accidents Is Between 5 And 6 P.M.

Between 5 and 6 p.m. is the fatal hour for British road accidents, it was shown in an analysis of accidents released by the ministry of transport which has been much concerned with the increasing loss of life.

Fatal accidents rose to a small peak between 7 and 8 a.m., drop during the morning, rise again between 12 and 1 p.m., drop in the afternoon and reach their highest point in the evening "rush hour."

This is only for working days. On Saturdays, Sunday and holidays most fatal accidents occur between 10 and 11 p.m.

Queen May Launch Liner
The British government announces that the King and Queen hope to go to Glasgow at the end of September to launch the new giant Cunard liner "Mauretania". Her Majesty, the announcement said, will perform the actual ceremony of launching the vessel.

COMING EVENTS

Sunday, June 3—Tennis: Carstairs at Crossfield. Tournament for the Tennis Challenge Cup.

The Crossfield Chronicle

ESTABLISHED 1907

THURSDAY, May 24, 1934.

Locals

Fred Pfeuti was a week-end visitor in Calgary.

Wm. Stillwell of Calgary was a visitor in town on Sunday.

Cremona annual sports day will be held on July 2nd.

Mr. and Mrs. C. Christianson spent Tuesday in Calgary.

Mr. and Mrs. Harold Robinson were Calgary visitors on Monday.

Mr. and Mrs. Geo. Jones were visitors in Calgary on Tuesday.

Mr. and Mrs. D. W. Carmichael and family visited friends in Didsbury on Sunday.

Audrey McLean is spending a 3 weeks holiday with her grandparents and uncles at Comrey.

The Calgary Monarchs senior baseball team will play here on Sunday, May 27th at 3 o'clock.

Rev. Longmire is busy beautifying the church and manse grounds with a lovely bouquet of flowers and a foliage plant, being the oldest mother present.

The high school baseball team will play at Keoma on Victoria Day.

Glen Williams will line up with the Bowden baseball team at the Olds tournament on Victoria Day.

BORN—To Mr. and Mrs. Lee Salisbury of Dog Pound, on May 21, 1934, a daughter.

Don't forget the baseball game on Sunday, Calgary Monarchs vs. Crossfield-Carstairs at 3 p.m.

Geo. Ainscough and Miss Phyllis Ainscough were city visitors on Saturday.

Rev. Longmire is attending the United Church Conference held during this week in Edmonton.

The Misses MacLeod, Percy Willis and Chas. Purvis of Turner Valley were visitors in town on Sunday last.

E. C. Collier was a visitor in town for a few hours on Tuesday night on his way from Edmonton to Calgary.

Rev. H. Young, Mrs. Young, and Miss Marjory Young of Trochu, were renewing acquaintances in town on Wednesday.

Mrs. G. Y. McLean left Wednesday morning for a 3 weeks visit at the home of her parents Mr. and Mrs. J. J. Evenson, Comrey, Alta.

At the meeting held on Monday evening several new members were added to the ranks of theatrical aspirants. The members will in future be known as Crossfield Dramatic Society.

Heavy rain on Sunday and Monday covered this entire district, assuring a plentiful supply of moisture for the present.

L. E. Evenson of Manyberries, Alta. is visiting at the home of his sister Mrs. G. Y. McLean for a few days.

We are glad to learn that Mrs. R. T. Amery, who underwent a serious operation at a Calgary on Monday, is getting along nicely.

Noble John Heaton, farmer of the Carstairs area for the past 30 years, died in a Calgary hospital Saturday following an illness of two years.

Mr. Vergil Green was united in holy wedlock to Miss Mary Brandon, on Wednesday afternoon at the home of the bride's parents. Rev. H. Young performed the ceremony.

Crossfield defeated Rodney on Tuesday evening in the first softball game of the season by a score of 13-12. It was a ding-dong contest and the winner was not decided until the last man was retired.

The Oneil softball team continued their winning ways on Friday last when they defeated the Crossfield public school team by a score of 26 to 23. A return game will be played in Crossfield on Friday next.

Jack Crocker who has been a patient at the Belcher hospital, Calgary, returned to his home here on Sunday. Mr. Crocker has not fully recovered from his recent illness, but he is feeling much better.

C. W. L. Sale of Home Cooking

Saturday, June 9th.

During the afternoon of Saturday May 19th the ladies of the Catholic Women's League held a meeting at the home of Mrs. E. Hegy, in Airdrie.

During the meeting it was decided to hold a strawberry and ice cream tea and sale of home cooking in the old Halliday & Co. store in Crossfield on Saturday afternoon, June 9th from 3 p.m. to 6 p.m.

Following the meeting a very enjoyable programme of music, readings and recitations was given by the hostess and some of her Airdrie friends. The very enjoyable afternoon was concluded by the serving of a dainty tea.

In spite of the threatening weather a nice congregation turned out for service at the Madden United Church on Sunday. The Mother's Day order of service was gone through. During the Service Mrs. Larson was presented with a lovely bouquet of flowers and a foliage plant, being the oldest mother present.

A meeting of wool growers of the district will be held in the Chronicle office on Saturday evening, May 26th at 8 o'clock, for the purpose of co-operating in disposing of this year's wool.

T. M. Mair

The Oneil softball team have won both their league games and look like the class of the league. In the opening game they defeated Tany Bryn by a score of 6-2, and Wednesday night humbled Lewis Lennon's Sunshine team by a score of 20 to 3.

I SAW

Vergil Green preparing for the wedding. Fred Patchell getting set for the sport of Kings. Frank Ruddy looking over the race entries. The village pessimist getting a good razing after the rain. Bank Cadin taking home two kids—his family is growing. Bill Blackadder trying to keep his nannie soot in the pasture. George Huser nursing a pair of bum tons. Everett Bids taking a load of lumber to Calgary. Squeaky Pete in town for a holiday. Happy McMillan eating sweet pickled spare ribs a la Chinese. Bob Sutherland exercising his frugal farming on the McGool place. O. E. Jones showing a nighther what a difference Elephant Brand Fertilizer makes to a field of wheat. Lee Ableman showing the Rodney boys how to hit that old softball on the nose. Clarence Stafford taking home a bag of hay. Town Constable Belshaw trying to locate a transient who had stolen his hammer. Constable Cameron taking three rod riders to Calgary on Wednesday—Too bad Don as one of the gang had "inside dope" on the ponies. Archie McFadyen preparing to give the Railway Commission an ear full on June 1. Archie knows his crossings.

At a meeting of the Dog Pound baseball team held recently, Ellis Banta was appointed manager and Lake Parsons, captain.

Weed Experts Make

Report on Sow Thistle

Line Elevators Distribute Booklets On Latest Methods of Eradication

The manner in which Sow Thistle reduces grain yields is shown in figures produced in a booklet dealing with latest methods of control and eradication of this weed just compiled by Dr. G. P. McKostie, Professor of Agronomy, and W. Tildesley, M.Sc. Assistant on Wood Research, of the Agricultural College of the University of Manitoba. The survey was conducted over a period of three years under the direction of, and financed by, the Northwest Grain Dealers' Association. Booklets dealing with this weed are being distributed this week at line country elevators.

The booklet deals with the plant; distribution in the West, origin of the weed; methods of spreading through seed and root system; the manner of damage caused by Sow Thistle; tables showing the average reduction in yield of wheat plants growing at different distances from Sow Thistle plants; methods of control through cultivation; use of chemicals and growth of sweet clover in areas where it is not necessary to summer-fallow to conserve moisture in combating Sow Thistle growth.

Farmers who are troubled with this weed and those who wish to keep their fields free from infestation are advised to obtain this booklet which is now available free of cost at all line country elevators. Booklets were recently issued by the Northwest Grain Dealers' Association dealing with Couch Grass control and the loss brought about by weeds in farm areas in the West.

At Your Service

Keeping Up Quality

The reputation of Canadian wheat on the markets of the world is due to the efforts western farmers have made to keep up the quality of their production.

And the reputation of United Grain Growers is similarly based on unremitting efforts to keep up the quality of its service to farmers in handling their grain with farm supplies.
